GREEN CAT CAN PROVIDE THE FULL RANGE OF SUPPORT AND SERVICES, TAILORED TO YOUR NEEDS, TO ECONOMICALLY DELIVER SMALL TO LARGE SCALE WIND PROJECTS.

With our dedicated team of over 65 Environmental Consultants, Project Managers, Engineers and Solicitors, Green Cat can provide the full range of support and services, tailored to your needs, to economically deliver small to large scale wind projects, from initial feasibility right through to planning consent.

HANDS ON AND EXPERIENCED

Our multidisciplinary team takes a hands on and positive approach to design, manage and deliver a diverse variety of projects through to planning consent, from farm diversification scheme to major wind farms developments. Since 2005, we have delivered over 40 planning consents across Scotland, from Argyll to Fife and Aberdeenshire to Scottish Borders.

PRO ACTIVE AND COLLABORATIVE

Green Cat has extensive consultation experience with most Local Authorities and Statutory Consultees in Scotland, including Scottish Natural Heritage, Historic Scotland and SEPA. Our broad understanding of planning requirements and long term working relationships with consultees enable us to quickly find effective solutions which satisfies requirements of all parties involved. We have extensive experience working with Local Planning Authorities to build a robust track records of over 40 planning consents.
