GREEN CAT RENEWABLES LTD HAS CONSIDERABLE EXPERIENCE IN SUPPORTING CLIENTS DEVELOP COMMERCIAL SCALE WIND AND HYDRO PROJECTS.

Green Cat Renewables engineering team of over 65 Environmental Consultants, Engineers, Geotechnical Engineers and Legal Support, in our five UK offices, has helped successfully deliver 50 privately owned projects (+110MW) from planning consent to electricity generation. These range from single turbines 330KW to multiple turbine 11.5MW wind project and various hydro schemes. We are currently working on many more wind and hydro schemes across the UK.

EXTENSIVE PROJECT MANAGING EXPERIENCE

Green Cat Renewables has extensive experience of project managing renewable projects through the construction phase and has developed a depth of knowledge of all the processes involved in helping delivering wind and hydro energy projects

CLOSE WORKING RELATIONSHIPS

Through working on these projects Green Cat has developed close working relationships with the following: manufacturers (including EWT, Gamesa, REPower and specifically Enercon), banks (including The Cooperative Bank, RBS, Triodos and Close Brothers), solicitors, power distributors, Local Authorities, and various contractors. These close working relationships enable us to quickly resolve any queries that arise.
